

Worksheet 10 – Hierarchical Clustering (Ward's method)

- (a) Use Ward's method to cluster the 4 items whose measurements on a single variable X are given in the table:

Item	Measurement x
1	7
2	10
3	22
4	24

(b) Draw a dendrogram for this problem.

(c) Write R code to validate that your dendrogram and the heights are correct.
