

Worksheet 18 – Understanding Dunn Index

```
> SepalLength<-c(5.1, 4.9, 7.0, 5.0, 5.1, 6.3, 6.5, 6.9)
> PetalLength<-c(1.4, 1.5, 4.7, 3.5, 3.3, 6.0, 5.1, 5.7)
> plot(SepalLength, PetalLength)
```

Suppose a clustering algorithm produced results as shown in the diagram above (3 groups).

(a) Calculate Dunn Index by hand.

(b) Find a way using R to verify your answer in part (a). Write your code below.
