

Worksheet 8 – Hierarchical Clustering (Average Linkage method)

The distances between pairs of 5 objects are given:

	1	2	3	4	5
1	0				
2	9	0			
3	3	7	0		
4	6	5	9	0	
5	11	10	2	8	0

- (a) Complete all steps of agglomerative clustering algorithm using average linkage method with the intention of drawing a dendrogram in part (b).

(b) Draw the dendrogram.

(c) Write R code to validate that your dendrogram and the heights are correct.
